Down and feather bedding and the tight construction of its coverings makes it naturally dust mite resistant. To be labeled hypoallergenic, down and feather bedding must meet specific, rigorous criteria.

**HYPOALLERGENIC**
The breathability of down and feather is a breathable insulating material that naturally wicks away perspiration and moisture and can help regulate body temperature.

**BREATHEABLE**

**HYPOALLERGENIC**
The breathability of down and feather is a breathable insulating material that naturally wicks away perspiration and moisture and can help regulate body temperature.

**BREATHEABLE**

**COMPRESSIBLE**
Natural down and feather isn’t just lightweight, it has greater loft recovery after compression than synthetics, making it perfect for camping gear.

**COMPRESSIONS**

**SUPERIOR WARMTH**
Down and feather is nature’s best insulator and, ounce-for-ounce, provides the warmest coverage of any material.

**SUPERIOR WARMTH**

**LONGEVITY**
With proper care, down and feather can last for years and will not wear out as quickly as alternative materials.

**LONGEVITY**

**LIGHTWEIGHT**
Down and feather provides warmth without weight. It’s the ideal, lightweight material for jackets, sleeping bags, and bedding.

**LIGHTWEIGHT**
